

hi this is in responce to a bill put out by congress bill HR4026 to stop traffic and weather on xm raido.i am a truck driver nation wide! and use the traffic and weather every day to avoid delays.when i need the information i need it now. not when the am stations decide to give it to you! and very little do they give you! this service i pay for so i can stay up to the min. on whats going on! and fast weather also is important in what i do.and i can recive it anywhere in the country and not lose it! i dont have time to keep tunning raidos to different stations or even trying to find them!!! every time i change states! this is an important service for all of us who drive the nations hiways!! to avoid bad weather is also a safety factor in what we do and we need the xm to stay on line.i respectfully request that this service not be stoped, we drive for a living and need this service! thank you steve
